

WorldPop Capacity Strengthening and Co-Development Activities

WorldPop is committed to producing data using transparent, documented, and shareable methods. Capacity strengthening is integral to many of our projects. We work closely with national statistical institutions around the globe to co-develop methods and datasets to ensure everyone can benefit from the power of small area population data.

STATISTICS AT A GLANCE

WorldPop has delivered

- **40+** workshops and training events around the globe since 2020
- Produced **>110** days of training material
- Delivered **16** programmes with beginner material
- Delivered **30** programmes with intermediate material
- Delivered **8** programmes with advanced material

8 TRAINING THEMES

- WorldPop Data and Methods Overview
- Population Estimation
- Field Operation/Microplanning Support
- Foundations in R
- Data processing/analysis/visualisation in R
- Foundations in GIS
- Data processing/analysis/visualisation in GIS
- Building Covariates
